

MICROTEACHING SELF-EVALUATION

Name _____ Date _____
Course name &
number _____

Did this lesson unfold as you had planned? If not, what changed and why? If yes, what were the aspects of the lesson that went well?

Briefly describe (include evidence) the extent of your students' engagement (and/or your classroom management) during the lesson. If you were not satisfied, what could you have done differently to improve upon their engagement (and/or your classroom management)?

Did the students learn what you had intended them to learn? How did (or will or could) you know? Refer to any data or students' work that helped (or will help or could help) you to determine your students' progress.

Based upon your reflections, what have you learned about your teaching strengths and weaknesses? What are some next steps that you could take before your next performance that could strengthen your teaching?
